DETAILED ACTION

1. Claims 1 – 4, 6 – 11, 13 – 18, and 20 – 33 are pending.

Allowable Subject Matter

2. Claims 1 – 4, 6 – 11, 13 – 18, and 20 – 33 are allowed.
3. The following is an examiner's statement of reasons for allowance:

Claims 1 – 4, 6 – 11, 13 – 18, 20 – 21, 25 – 26, and 32 – 33 are allowed because Applicant's arguments submitted in the Appeal Brief filed 05 February 2009 set forth why the claimed invention is different from the prior art of record. Specifically, Applicant argues that the prior art of record does not teach the programmable I/O port required by the claimed invention (Appeal Brief Filed 05 February 2009; Argument C). Applicant also argues that claims 15 – 18 and 20 – 21 are directed towards statutory subject matter because the claims recite a "computer readable storage medium" (Appeal Brief Filed 05 February 2009; Argument A). Applicant's arguments are persuasive, and therefore, the claims are allowed.

Claims 22 – 26 are allowed because Applicant's arguments submitted in the Appeal Brief filed 05 February 2009 set forth why the claimed invention is different from the prior art of record. Specifically, Applicant argues that the prior art of record does not teach any I/O ports which are configured in accordance with a configuration message from a user input (Appeal Brief Filed 05 February 2009; Argument B). Applicant argues that the prior art of record does not teach "configuring an input/output (I/O) port of the

one telemetry device according to a protocol adapted for the two-way paging system, the I/O port being coupled to a corresponding one of the objects, and the one telemetry device setting parameters relating to the I/O port according to the configuration message," as required by independent claim 22 (Appeal Brief Filed 05 February 2009; Argument B). Applicant's arguments are persuasive, and therefore, the claims are allowed.

Claims 27 – 31 are allowed because Applicant's arguments submitted in the Appeal Brief filed 05 February 2009 set forth why the claimed invention is different from the prior art of record. Specifically, Applicant argues that the prior art of record does not teach any I/O ports which are configured in accordance with a configuration message from a user input (Appeal Brief Filed 05 February 2009; Argument B). Applicant argues that the prior art of record does not teach "configuring an input/output (I/O) port of the one telemetry device according to a protocol adapted for the two-way paging system, the I/O port being coupled to a corresponding one of the objects, and the one telemetry device setting parameters relating to the I/O port according to the configuration message," as required by independent claim 27 (Appeal Brief Filed 05 February 2009; Argument B). Applicant's arguments are persuasive, and therefore, the claims are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
